Robotic Process Automation

Foundation

PROJECT

Movies App

- Currently working on a Movies App using React
- The app fetches and displays the latest movie details, including summaries, release dates, and other key information, via API integration.
- Focused on enhancing front-end development, managing API calls, and improving the overall user interface and experience.

Tech Stack:

- Frontend: React
- API: Fetching movie data from a third-party API
- Tools: HTML, CSS, JavaScript
